Line-following algorithm flowchart

The four rules at a glance

Left sensor	Right sensor	Robot does	Why
White	White	**FORWARD**	The line is between the sensors. Keep going straight.
Black	White	**LEFT**	The left sensor sees black, so the line is curving left. Turn left to follow it.
White	Black	**RIGHT**	The right sensor sees black, so the line is curving right. Turn right to follow it.
Black	Black	**STOP**	Both sensors see black: a cross line or the finish. Stop safely.

Every Arduino sketch
