# Assessment rubric

How the final project is judged

| Criterion | Beginning (1) | Developing (2) | Secure (3) | Excellent (4) |
|---|---|---|---|---|
| **Problem and labels** | No clear purpose | A purpose, but labels overlap | Clear purpose and distinct labels | Useful purpose; labels chosen with reasons |
| **Data** | Few, near-identical examples | Enough examples, little variety | Balanced examples with variety | Balanced, varied, and test data kept separate |
| **Testing** | Not tested | Tested a few times | Tested every label; accuracy reported | Several rounds; explains the biggest mix-up |
| **Improving** | No changes | One change, not tested | A change that improved the result | Changes tested one at a time, with results |
| **Fair and safe** | Not considered | Mentions fairness | Checks who it might fail; no personal data | Explains limits and what a person should do when it is unsure |

The model's labels, examples, test accuracy and rounds are recorded automatically with the submission. Pass: 12 of 20 or more.
