MYCAMPUSVIEW ACADEMY · AI FOR YOUNG BUILDERS

Prompt-writing guide

Ask clearly, check carefully, stay safe

A clear prompt says three things

What	How long or what shape	Who it is for
Explain why Mars looks red	in 3 short points	for a Class 7 student
Quiz me on fractions	3 questions, then the answers	for Class 6

Vague → clear

Vague	Clear
"Help."	"Give me 3 tips to remember the planets in order, for Class 6."
"Stuff about history."	"Tell me 4 facts about the Indus Valley cities, in simple words."
"Make a story."	"Start a 5-sentence mystery story set in a school library."

Good follow-ups

- "Explain that more simply, with an example."
- "Give me a hint, not the answer."
- "What is a common mistake with this?"
- "Where could I check this fact?"

Never put in a prompt: your name, address, phone number, school, passwords, or anyone else's photos or details.

Fact check: AI can be wrong even when it sounds sure. Check dates, numbers and facts in a textbook or with a teacher.

Try it: rewrite these prompts

"Tell me about plants."

"Maths help."
