MYCAMPUSVIEW ACADEMY · AI FOR YOUNG BUILDERS

Safe AI rules poster

Six rules for using AI well

1 Keep personal details private

Never type your name, address, phone number, school, photos or passwords into an AI or any website.

2 AI can be wrong

It sounds sure even when it is wrong. Check important facts in a book or with a teacher.

3 Be honest

Say when and how you used AI. Copying AI answers as your own work is cheating.

4 Ask before you share

Never upload or share another person's photo or details without their permission.

5 Stop and check

Surprising picture, video or voice? It could be a deepfake. Check where it came from before you believe or share it.

6 Tell an adult

If anything online worries or upsets you, stop and tell a parent or teacher straight away.

Remember: AI is a tool that predicts. You are the one who thinks, checks and decides.
