Unplugged activity cards

AI on paper: no computer needed

Activity 1: Human nearest neighbours

1. Draw a chart on the board: sweetness across, size up.
2. Each student is a fruit card (below) and stands on its spot.
3. A "mystery fruit" stands somewhere new. The 3 nearest students vote: mango or lemon?
4. Try again with 1 neighbour, then 5. Does the answer change? Why?

Activity 2: Build a decision tree

1. Cut out the animal cards.
2. In groups, write ONE yes-or-no question that splits the cards into two piles.
3. Keep asking questions until every pile has only birds, only mammals or only fish.
4. Test your tree on a penguin, a bat and a dolphin. Does it still work?
